

# TensioMed TensioDay Plus™

The Creative Solution  
of Simultaneous Peripheral and Central BP Monitoring

A new wave in ABPM

With its outstanding ability, **TensioDay Plus™** is surely more than meets the eye. The device can simultaneously determine the peripheral and the central blood pressure by oscillometric method. It opens new perspectives in the monitoring of central systolic blood pressure, which has increasingly important role in cardiovascular diagnostics. The increased **aortic blood pressure** causes deteriorative effect on the central arteries.
